

INTEGRATED POLICY: ENVIRONMENT AND SAFETY

The company "SAMI INSTRUMENTS srl" has adopted an Integrated management system for Environment and Safety, in compliance to UNI EN ISO 14001 and BS OHSAS 18001 standards. SAMI INSTRUMENTS srl has established to achieve the following targets:

- *reduce with time its impact on the environment and the risks for the SSL related to its own productive cycles ;*
- *the commitment to protect the environment through a constant check of the emissions in atmosphere, a correct waste disposal, a prevention of the pollution of the waters and the commitment to comply to the duties of the current legislation;*
- *to evaluate the needs and expectations of the interested parties;*
- *to involve the internal staff in the fulfillment and improvement of the Integrated System, through a continuous awareness and training on the prevention of the pollution, of the injuries and of the occupational diseases;*
- *to ensure that all the activities are undertaken in accordance with the applicable laws and regulations regarding the themes of health, safety and environment;*
- *to involve and raise awareness in its subcontractors and suppliers on the prevention of the pollution, of the injuries and of the occupational diseases, in the same way the company has done for the internal staff.*

To reach these targets, the company has adopted the following tools:

- *the attribution of responsibility for the management system to the whole company, from the head management to workers, according to their own expertise;*
- *the commitment of the management to provide the necessary resources;*
- *the organic and clear definition of the tasks and responsibilities of the staff involved in all the operative processes of the company and their active involvement;*
- *the complete and clear identification of the dangers and the evaluation of the safety risks for the safety of anyone who can be directly or indirectly related to the company activities;*
- *the complete and clear identification and evaluation of the environmental risks of anyone who can be directly or indirectly related to the company activities;*
- *the active monitoring and operational control on the processes and the effective communication of the information necessary for their coordination;*
- *the continuous update of new technologies, management methods, control of SSL risks and environmental risks;*
- *the commitment to examine regularly the environmental and SSL policy and the Integrated Management System applied.*

Together with the abovementioned objectives, the management establishes year by year the specific and measureable goals, which may be related to particular aspects.

In order to reach these goals, the management will provide the necessary resources and kindly asks for the active cooperation of all the staff.
